

Purchase Order Outbound Create/ Change (POST)

Overview

This API endpoint is used to post order data to click order creation or change. It accepts a JSON payload containing details about the order, including document number, line of business, status, error messages, ERP number, subtype, and line information. The endpoint is designed to handle order processing requests and return the results asynchronously.

Sample Curl

```
curl --location 'https://{ClickBaseUrl}/{BuyerPartnerName}/{integrationName}' \  
--header 'accept: application/octet-stream' \  
--header 'Authorization: Bearer <token>' \  
--header 'Content-Type: application/json' \  
--header 'event: <eventName>' \  
--header 'subtypeAppId: {subtypeAppId}' \  
--data '{

Data Elements

Here are the tables for each object in the provided JSON, with columns for "Property", "Required?", "Data type", "Description", and "Validations / Exceptions".

Root Object

Property	Required?	Data type	Description	Validations / Exceptions
		string	Location number for billing	
agreementEndDate		datetime	End date of the agreement	
agreementStartDate		datetime	Start date of the agreement	
assignedTo		string	Person assigned	
bpc		number	Business process code	
buyerPartnerName		string	Name of the buyer partner	
closedForInvoicing		boolean	Indicates if closed for invoicing	
closedForReceipt		boolean	Indicates if closed for receipt	
closedforShipment		boolean	Indicates if closed for shipment	
createdOn		datetime	Creation timestamp	
customerName		string	Name of the customer	

deliverToLocationCode		string	Location code for delivery	
documenOutboundInterfaceMessage		string	Message for outbound interface document	
documentDate		datetime	Date of the document	
documentFileId		string	File ID associated with the document	
documentId		string	Unique document identifier	
documentName		string	Name of the document	
documentNumber		string	Number assigned to the document	
documentOutboundInterfaceDateTime		datetime	Date and time of outbound interface processing	
documentOutboundInterfaceID		string	Unique ID of outbound interface	
documentOutboundInterfaceStatus		string	Status of outbound interface processing	
documentStatusChangedDate		datetime	Timestamp when document status changed	
documentVersionNumber		string	Version number of the document	
ersEnabled		boolean	Indicates if ERS (Evaluated Receipt Settlement) is enabled	
exceptionOrderFlag		boolean	Indicates if the order is marked as an exception	
freight		string	Freight details	
grNumber		string	Goods receipt number	
holdDate		datetime	Date when the document was put on hold	
holdFlag		boolean	Indicates if the document is currently on hold	
holdReason		string	Reason for putting the document on hold	
holdReleasedBy		string	User who released the hold	
holdReleasedDate		datetime	Date when the hold was released	
id		string	Unique identifier	
incoTermDescription		string	Description of the Incoterm	
isDeleted		boolean	Indicates if the document is deleted	
itemNumber		string	Unique number identifying an item	
lastModifiedBy		datetime	Timestamp when the document was last modified	
lastModifiedDate		datetime	Last modification date	
markupFlatFee		number	Flat fee markup applied	
markupPercentage		number	Percentage markup applied	
moduleId		number	Identifier of the module	
notesAttachmentsLinks		string	Links to attachments in notes	
orderAuthor		string	Name of the person who authored the order	
orderHeaderId		string	Identifier of the order header	

orderName		string	Name of the order	
orderNumber		string	Order number	
orderRemark		string	Remarks for the order	
orderSpecialInstructionsFlag		boolean	Indicates if special instructions exist	
orderTotal		number	Total amount of the order	
orderType		string	Type of order	
otherCharges		number	Additional charges	
plannerContact		string	Planner contact details	
plannerEmail		string	Email of the planner	
plannerName		string	Name of the planner	
previousDocumentId		string	ID of the previous document	
receiptReference		string	Reference number for the receipt	
receiptStatus		string	Status of the receipt	
receivedQuantity		string	Quantity received	
rootDocumentId		string	Root document ID	
shipToPartyName		string	Name of the ship-to party	
shippingMethod		string	Method of shipping	
sourceDetails		string	Details about the source	
sourceSystemOrderNumber		string	Order number in the source system	
sourceSystemVersionNumber		string	Version number in the source system	
subType		string	Subtype of the document	
subTypeName		string	Name of the document subtype	
subtypeApplId		string	Application ID of the subtype	
suggestedLinetaxTotal		number	Total line tax suggested	
supplierCode		string	Supplier code	
supplierEmail		string	Supplier email	
supplierFax		string	Supplier fax number	
supplierItemNumber		string	Supplier's item number	
supplierName		string	Name of the supplier	
supplierPhone		string	Phone number of the supplier	
supplierReferenceOrderNumber		string	Reference order number from supplier	
taxCode		string	Tax code applied	
taxDescription		string	Description of the tax	

taxExempt		string	Indicates if tax exemption applies	
taxTotal		number	Total tax amount	
terminationDate		datetime	Termination date of the document	
thirdPartyReferenceObjects		string	Third-party reference details	
totalFreightAmount		number	Total freight cost	
totalLineSubTotal		number	Subtotal for all lines in the order	
totalLineTotal		number	Total line amount	
totalMarkup		number	Total markup applied	
totalOrderAmount		number	Total amount for the order	
totalRequestQuantity		string	Total requested quantity	
transactionId		string	Unique transaction identifier	
version		string	Version of the document	

Bill To				
Property	Required?	Data type	Description	Validations / Exceptions
addressCode		string	Address code of the billing entity	
addressInfo		object	Address details	
contactEmail		string	Contact email address	
contactName		string	Contact person name	
contactPhone		string	Contact phone number	
locationId		string	Unique location identifier	
locationName		string	Name of the location	
locationNumber		string	Location number	
locationOrgEntity		object	Organizational entity details	
locationOrgEntityCode		string	Code of organizational entity	
locationType		array	Type of location	
tradingPartnerType		object	Trading partner type details	

billToAddress				
Property	Required?	Data type	Description	Validations / Exceptions
addressCode		string	Address code	

addressInfo		object	Address information	
contactEmail		string	Contact email address	
contactName		string	Contact person's name	
contactPhone		string	Contact phone number	
locationId		string	Unique identifier for the location	
locationName		string	Name of the location	
locationNumber		string	Location number	
locationOrgEntity		object	Organization entity details	
locationOrgEntityCode		string	Code of the organization entity	
locationType		array	List of location types	
tradingPartnerType		object	Trading partner type details	

billToTradingPartner				
Property	Required?	Data type	Description	Validations / Exceptions
clientPartnerCode		string	Client partner code	
legalCompanyName		string	Legal company name	
smartPartnerCode		string	Smart partner code	
status		string	Status of the trading partner	
supplierPartnerCode		string	Supplier partner code	
tradingPartnerType		object	Trading partner type details	

billToTradingPartnerContact				
Property	Required?	Data type	Description	Validations / Exceptions
clientContactCode		string	Client contact code	
companyName		string	Name of the company	
contactCode		number	Unique identifier for the contact	
emailAddress		string	Email address	
firstName		string	First name of the contact	
isDeleted		boolean	Indicates if the contact is deleted	

isPrimary		boolean	Indicates if the contact is primary	
lastName		string	Last name of the contact	
legalCompanyName		string	Legal company name	
personaCode		number	Persona code	
userInfo		object	User information	

businessUnit				
Property	Required?	Data type	Description	Validations / Exceptions
culture		string	Culture code	
displayName		string	Display name of the business unit	
entityCode		string	Code of the entity	
entityDetailCode		number	Detail code of the entity	
entityDetailDescription		string	Description of the entity detail	
entityId		number	Unique identifier for the entity	
entityName		string	Name of the entity	
entityType		string	Type of entity	
level		number	Hierarchical level	
lobCode		string	Line of business code	
lobName		string	Line of business name	
parentEntityCode		string	Code of the parent entity	
parentEntityDetailCode		number	Detail code of the parent entity	
parentOrgEntities		array	List of parent organization entities	
uniqueOrderOrgEntityNumber		string	Unique order organization number	

buyerContact				
Property	Required?	Data type	Description	Validations / Exceptions
clientContactCode		string	Client contact code	
companyName		string	Name of the company	
contactCode		number	Contact code	
emailAddress		string	Email address	
firstName		string	First name of the contact	

isDeleted		boolean	Indicates if the contact is deleted	
isPrimary		boolean	Indicates if the contact is primary	
lastName		string	Last name of the contact	
legalCompanyName		string	Legal company name	
personaCode		number	Persona code	
userInfo		object	User information	

buyerInterfaceStatus				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Status code	
codeType		string	Type of code	
description		string	Description of the status	
lob		string	Line of business	
name		string	Name of the status	
source		string	Source of the status	
sourceSystemName		string	Name of the source system	
sourceSystemValue		string	Value from the source system	
status		string	Status of the buyer interface	
statusChangeDate		datetime	Date when status changed	
statusCode		number	Status code	
version		number	Version number of the status	

changeType				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Change type code	
codeType		string	Type of change	

description		string	Description of the change type	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the change type	
name		string	Name of the change type	
source		string	Source of the change	
status		string	Status of the change	
uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the change type	

companyCode				
Property	Required?	Data type	Description	Validations / Exceptions
culture		string	Culture code	
displayName		string	Display name of the company code	
entityCode		string	Unique entity code	
entityDetailCode		number	Detail code of the entity	
entityDetailDescription		string	Description of entity details	
entityId		number	Unique entity identifier	
entityName		string	Name of the entity	
entityType		string	Type of entity	
level		number	Level of the entity in hierarchy	
lobCode		string	Line of business code	
lobName		string	Line of business name	
parentEntityCode		string	Code of the parent entity	
parentEntityDetailCode		number	Detail code of the parent entity	
parentOrgEntities		array	List of parent organization entities	
uniqueOrderOrgEntityNumber		string	Unique order organization number	

createdBy				
Property	Required?	Data type	Description	Validations / Exceptions
clientContactCode		string	Client contact code	
companyName		string	Name of the company	
contactCode		number	Unique identifier for the contact	
createdOn		datetime	Timestamp of creation	
cultureCode		string	Culture code	
defaultCurrencyCode		string	Default currency code	
emailAddress		string	Email address of the user	
firstName		string	First name of the user	
isActive		boolean	Indicates if the user is active	
lastName		string	Last name of the user	
mobileNo		string	Mobile phone number	
timeZone		string	Time zone of the user	
userId		number	Unique user identifier	
userName		string	Username	

currency				
Property	Required?	Data type	Description	Validations / Exceptions
code		string	Currency code	
countryCodes		string	Associated country codes	
isActive		boolean	Indicates if the currency is active	
name		string	Name of the currency	
preferenceOrder		number	Preference order of the currency	
symbol		string	Symbol of the currency	
version		number	Version number	

customerSiteTradingPartner				
Property	Required?	Data type	Description	Validations / Exceptions
clientPartnerCode		string	Client partner code	
legalCompanyName		string	Legal company name	
smartPartnerCode		string	Smart partner code	
supplierPartnerCode		string	Supplier partner code	
tradingPartnerType		object	Trading partner type details	

deliverTo				
Property	Required?	Data type	Description	Validations / Exceptions
clientContactCode		string	Client contact code	
companyName		string	Name of the company	
contactCode		number	Contact code	
emailAddress		string	Email address	
firstName		string	First name of the contact	
isDeleted		boolean	Indicates if the contact is deleted	
isPrimary		boolean	Indicates if the contact is primary	
lastName		string	Last name of the contact	
legalCompanyName		string	Legal company name	
personaCode		number	Persona code	
userInfo		object	User information	

demandSourceType				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Source type code	
codeType		string	Type of code	
description		string	Description of the demand source type	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the source type	
name		string	Name of the demand source type	
source		string	Source of the demand	
status		string	Status of the demand source	
uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the demand source type	

dispatchMode				
Property	Required?	Data type	Description	Validations / Exceptions
auctionFormatId		string	Auction format identifier	
auctionFormatName		string	Name of the auction format	
contractFormatId		string	Contract format identifier	
contractFormatName		string	Name of the contract format	
dispatchModeValue		string	Value assigned to dispatch mode	
invoiceFormatId		string	Invoice format identifier	
invoiceFormatName		string	Name of the invoice format	

poFormatId		string	Purchase order format identifier	
poFormatName		string	Name of the purchase order format	
rfxFormatName		string	Name of the RFX format	
rxFormatId		string	RX format identifier	
serviceConfirmationFormatId		string	Service confirmation format identifier	
serviceConfirmationFormatName		string	Name of the service confirmation format	

documentStage				
Property	Required?	Data type	Description	Validations / Exceptions
code		string	Document stage code	
culture		string	Culture identifier	
id		string	Unique identifier for stage	
name		string	Name of the document stage	
version		number	Version number of the stage	

documentStatus				
Property	Required?	Data type	Description	Validations / Exceptions
code		number	Status code	
culture		string	Culture identifier	
id		string	Unique identifier for document status	
name		string	Name of the document status	
stateCode		string	State code for the document status	

stateName		string	Name of the document state	
statusPriority		number	Priority level of the document status	
version		number	Version number of the document status	

incoTermCode				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Incoterm code	
codeType		string	Type of incoterm	
description		string	Description of the incoterm	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the incoterm	
name		string	Name of the incoterm	
source		string	Source of the incoterm	
status		string	Status of the incoterm	
uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the incoterm	

interfaceStatus				
Property	Required?	Data type	Description	Validations / Exceptions
lob		string	Line of business	

sourceSystemERPReference		string	ERP reference of the source system	
sourceSystemName		string	Name of the source system	
sourceSystemValue		string	Value from the source system	
statusChangeDate		datetime	Date when status changed	
statusCode		number	Status code	
statusName		string	Name of the status	

invoicingStatus				
Property	Required?	Data type	Description	Validations / Exceptions
code		number	Status code	
culture		string	Culture identifier	
id		string	Unique identifier for invoicing status	
name		string	Name of the invoicing status	
stateCode		string	State code for the invoicing status	
stateName		string	Name of the invoicing state	
statusPriority		number	Priority level of the invoicing status	
version		number	Version number of the invoicing status	

matchType				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Match type code	

codeType		string	Type of match	
description		string	Description of the match type	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the match type	
name		string	Name of the match type	
source		string	Source of the match	
status		string	Status of the match type	
uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the match type	

operationType				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Operation type code	
codeType		string	Type of operation	
description		string	Description of the operation type	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the operation type	
name		string	Name of the operation type	
source		string	Source of the operation	
status		string	Status of the operation	
uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the operation type	

orderPriority				
Property	Required?	Data type	Description	Validations / Exceptions
code		string	Order priority code	
culture		string	Culture identifier	
id		string	Unique identifier for priority	
name		string	Name of the order priority	
version		number	Version number of the priority	

paymentTerms				
Property	Required?	Data type	Description	Validations / Exceptions
description		string	Description of the payment terms	
discountDays		number	Number of days for discount	
discountPercentage		number	Discount percentage	
dueDays		number	Number of due days	
isActive		boolean	Indicates if payment term is active	
lob		string	Line of business	
markAsDefault		boolean	Indicates if it's the default payment term	
orgEntity		string	Organization entity	
paymentTermCode		string	Code for the payment term	
paymentTermName		string	Name of the payment term	

purchaseType				
--------------	--	--	--	--

Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Purchase type code	
codeType		string	Type of purchase	
description		string	Description of the purchase type	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the purchase type	
name		string	Name of the purchase type	
source		string	Source of the purchase	
status		string	Status of the purchase type	
uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the purchase type	

receivingStatus				
Property	Required?	Data type	Description	Validations / Exceptions
code		number	Status code	
culture		string	Culture identifier	
id		string	Unique identifier for receiving status	
name		string	Name of the receiving status	
stateCode		string	State code for the receiving status	
stateName		string	Name of the receiving state	
statusPriority		number	Priority level of the receiving status	
version		number	Version number of the receiving status	

--	--	--	--	--

shippingStatus				
Property	Required?	Data type	Description	Validations / Exceptions
code		number	Status code	
culture		string	Culture identifier	
id		string	Unique identifier for shipping status	
name		string	Name of the shipping status	
stateCode		string	State code for the shipping status	
stateName		string	Name of the shipping state	
statusPriority		number	Priority level of the shipping status	
version		number	Version number of the shipping status	

type				
Property	Required?	Data type	Description	Validations / Exceptions
appCodeId		number	Application code identifier	
clientCode		string	Client code	
code		string	Type code	
codeType		string	Type classification	
description		string	Description of the type	
exceptionOrderFlag		boolean	Indicates if it's an exception order	
exceptionOrderId		number	Exception order ID	
id		string	Unique identifier for the type	
name		string	Name of the type	
source		string	Source of the type	
status		string	Status of the type	

uniqueOrderAppCode		string	Unique order application code	
version		number	Version of the type	

addressInfo				
Property	Required?	Data type	Description	Validations / Exceptions
addressCode		string	Address code	
addressInfoUniqueNumber		string	Unique identifier for address	
addressline1		string	Address line 1	
addressline2		string	Address line 2	
addressline3		string	Address line 3	
city		string	City name	
countryInfo		object	Country information	
county		string	County name	
cultureCode		string	Culture code	
extensionNo1		string	Extension number 1	
extensionNo2		string	Extension number 2	
faxNo		string	Fax number	
iSDCode		string	International dialing code	
latitude		string	Latitude coordinates	
longitude		string	Longitude coordinates	
mobileNo		string	Mobile phone number	
pOBoxNumber		string	P.O. Box number	
phoneNo1		string	Primary phone number	
phoneNo2		string	Secondary phone number	
stateInfo		object	State details	
zipCode		string	Zip code	

countryInfo				
Property	Required?	Data type	Description	Validations / Exceptions
code		string	Country code	
culture		string	Culture identifier	
id		string	Unique identifier for country	
name		string	Country name	
version		number	Version number	

stateInfo				
Property	Required?	Data type	Description	Validations / Exceptions
code		string	State code	
culture		string	Culture identifier	
id		string	Unique identifier for state	
name		string	State name	
version		number	Version number	

locationOrgEntity				
Property	Required?	Data type	Description	Validations / Exceptions
culture		string	Culture code	
displayName		string	Display name of the entity	
entityCode		string	Unique entity code	
entityDetailCode		number	Detail code of the entity	
entityDetailDescription		string	Description of the entity	
entityId		number	Unique entity identifier	

entityName		string	Name of the entity	
entityType		string	Type of entity	
level		number	Level of the entity in hierarchy	
lobCode		string	Line of business code	
lobName		string	Line of business name	
parentEntityCode		string	Code of the parent entity	
parentEntityDetailCode		number	Detail code of the parent entity	
parentOrgEntities		array	List of parent organization entities	
uniqueOrderOrgEntityNumber		string	Unique order organization number	

tradingPartnerType				
Property	Required?	Data type	Description	Validations / Exceptions
code		string	Trading partner type code	
culture		string	Culture identifier	
id		string	Unique identifier for partner type	
name		string	Trading partner type name	
version		number	Version number	

userInfo				
Property	Required?	Data type	Description	Validations / Exceptions
emailAddress		string	Email address	
firstName		string	First name of the user	
lastName		string	Last name of the user	
mobileNo		string	Mobile phone number	
timeZone		string	Time zone of the user	

userId		number	Unique user identifier	
userName		string	Username	

createdBy				
Property	Required?	Data type	Description	Validations / Exceptions
clientContactCode		string	Client contact code	
companyName		string	Name of the company	
contactCode		number	Unique identifier for the contact	
createdOn		datetime	Timestamp of creation	
cultureCode		string	Culture code	
defaultCurrencyCode		string	Default currency code	
emailAddress		string	Email address of the user	
firstName		string	First name of the user	
isActive		boolean	Indicates if the user is active	
lastName		string	Last name of the user	
mobileNo		string	Mobile phone number	
timeZone		string	Time zone of the user	
userId		number	Unique user identifier	
userName		string	Username	

customerSiteTradingPartnerLocation				
Property	Required?	Data type	Description	Validations / Exceptions
addressCode		string	Address code	
addressInfo		object	Address details	

locationId		string	Unique location identifier	
locationName		string	Name of the location	
locationNumber		string	Location number	
locationType		array	Type of location	

deliverToTradingPartnerLocation				
Property	Required?	Data type	Description	Validations / Exceptions
addressCode		string	Address code	
addressInfo		object	Address details	
locationId		string	Unique location identifier	
locationName		string	Name of the location	
locationNumber		string	Location number	
locationType		array	Type of location	

orderItems				
Property	Required?	Data type	Description	Validations / Exceptions
additionalLeadTime		number	Additional lead time for order item	
auditFields		object	Audit fields for order item	
billTo		object	Billing information	
billToAddress		object	Billing address details	
businessUnit		object	Business unit details	
buyerInterfaceStatus		object	Buyer interface status	
cancelReason		object	Reason for cancellation	
category		object	Item category details	
changeType		object	Change type details	
closedForInvoicing		boolean	Indicates if closed for invoicing	
closedForReceipt		boolean	Indicates if closed for receipt	

closedForShipment		boolean	Indicates if closed for shipment	
commodityCode		string	Code for commodity type	
contractExpiryDate		datetime	Expiry date of the contract	
contractLimit		string	Contract limit details	
contractLineNumber		string	Line number in contract	
contractName		string	Name of the contract	
contractNumber		string	Contract number	
createdBy		object	Creator details	
createdOn		datetime	Creation timestamp	
deliverTo		object	Delivery information	
discountPercentage		number	Discount percentage	
documentId		string	Document identifier	
documentNumber		string	Document number	
documentStatus		object	Status of document	
invoiceAmount		number	Invoiced amount	
invoiceQuantity		number	Invoiced quantity	
item		object	Item details	

item				
Property	Required?	Data type	Description	Validations / Exceptions
itemCode		string	Code of the item	
itemDescription		string	Description of the item	
itemName		string	Name of the item	
itemType		string	Type of item	

Request Schedule				
Property	Required?	Data type	Description	Validations / Exceptions

additionalLeadTime		number	Additional lead time	
bpc		number	BPC value	
documentId		string	Document ID	
documentNumber		string	Document number	
documentStatusChangedDate		datetime	Document status changed date	
downPaymentPercentage		number	Down payment percentage	
downpaymentAmount		number	Down payment amount	
endDate		datetime	End date	
expectedShipmentDate		datetime	Expected shipment date	
firstResponseTime		datetime	First response time	
id		string	ID	
isDeleted		boolean	Is deleted	
latestReceiptDate		datetime	Latest receipt date	
latestResponseTime		datetime	Latest response time	
latestReturnDate		datetime	Latest return date	
latestServiceConfirmationDate		datetime	Latest service confirmation date	
latestShipmentDate		datetime	Latest shipment date	
lineId		string	Line ID	
lineItemNumber		string	Line item number	
lineSubTotal		number	Line sub total	
modifiedOn		datetime	Modified on	
needByDate		datetime	Need by date	
notesAttachmentsLinks		string	Notes attachments links	
orderHeaderId		string	Order header ID	
orderLineId		string	Order line ID	
orderLineInfo_lineId		string	Order line info line ID	
orderingLocationEmail		string	Ordering location email	
orderingLocationPhone		string	Ordering location phone	
originalNeedByDate		datetime	Original need by date	

originalPromisedDate		datetime	Original promised date	
originalPromisedQuantity		number	Original promised quantity	
originalQuantity		number	Original quantity	
parent_id		string	Parent ID	
previousExpectedShipmentDate		datetime	Previous expected shipment date	
previousNeedByDate		datetime	Previous need by date	
previousOrderedQuantity		number	Previous ordered quantity	
previousPromisedDate		datetime	Previous promised date	
previousRequestScheduleId		string	Previous request schedule ID	
previousTotalPromisedQuantity		number	Previous total promised quantity	
promisedDate		datetime	Promised date	
promisedQuantity		number	Promised quantity	
quantity		number	Quantity	
quantityUoM		number	Quantity UoM	
requestDate		datetime	Request date	
requestQuantity		number	Request quantity	
requestScheduleId		string	Request schedule ID	
requestScheduleItemNumber		string	Request schedule item number	
requestScheduleNumber		number	Request schedule number	
requestShipmentDate		datetime	Request shipment date	
rootDocumentId		string	Root document ID	
rootLineId		string	Root line ID	
rootRequestScheduleId		string	Root request schedule ID	
root_id		string	Root ID	
servicePlannedEndDate		datetime	Service planned end date	

servicePlannedStartDate		datetime	Service planned start date	
startDate		datetime	Start date	
status		string	Status	
supplierReferenceOrderLineNumber		string	Supplier reference order line number	
supplierReferenceOrderNumber		string	Supplier reference order number	
supplierReferenceOrderScheduleNumber		string	Supplier reference order schedule number	
supplierSuggestedUnitPrice		number	Supplier suggested unit price	
thirdPartyReferenceObjects		string	Third party reference objects	
totalAcceptedQuantity		number	Total accepted quantity	
totalCreditedAmount		number	Total credited amount	
totalCreditedQuantity		number	Total credited quantity	
totalDefectiveQuantity		number	Total defective quantity	
totalDeliveredQuantity		number	Total delivered quantity	
totalInvoicedAmount		number	Total invoiced amount	
totalInvoicedQuantity		number	Total invoiced quantity	
totalPickedQuantity		number	Total picked quantity	
totalProductionCompletedQuantity		number	Total production completed quantity	
totalPromisedQuantity		number	Total promised quantity	

PromisSchedules				
Property	Required?	Data type	Description	Validations / Exceptions
createdDate		datetime	Creation date	
documentId		string	Document ID	

isDeleted		boolean	Is deleted	
lastPromiseQuantity		number	Last promise quantity	
lastPromiseShipmentDate		datetime	Last promise shipment date	
lastQuantity		number	Last quantity	
lineItemNumber		string	Line item number	
lineNumber		number	Line number	
migratedSource		string	Migrated source	
modifiedDate		datetime	Modification date	
orderHeaderId		string	Order header ID	
orderLineId		string	Order line ID	
orderRequestSchedules_requestScheduleId		string	Order request schedule ID	
parent_id		string	Parent ID	
promiseScheduleId		string	Promise schedule ID	
promiseScheduleItemNumber		string	Promise schedule item number	
promiseScheduleNumber		number	Promise schedule number	
promiseShipmentDate		datetime	Promise shipment date	
promisedDate		datetime	Promised date	
promisedQuantity		number	Promised quantity	
requestScheduleId		string	Request schedule ID	
requestScheduleItemNumber		string	Request schedule item number	
rootDocumentId		string	Root document ID	
root_id		string	Root ID	

Request Headers				
Property	Required?	Data type	Description	Validations / Exceptions
Authorization		string	Contains the Bearer token for authentication.	

Content-Type		string	Indicates the media type of the response being sent to the server.	
subtypeApplId		string	A unique identifier for the subtype application	
event		string	Represents the command	

Response Body				
Property	Required?	Data type	Description	Validations / Exceptions
exception		object	Error details if any	
data		object	Data returned by API	
hasData		boolean	Flag indicating whether response has data	
hasException		boolean	Flag indicating whether response has exception
