}

```

Data Elements

Request Payload				
Property	Required?	Data type	Description	Validations / Exceptions
sourceSystemValue	yes	String	Unique Identifier to find requisition inbound file details	
documentId		String	Unique Identifier for requisition document	

Response Success or Failure				
Property	Required?	Data type	Description	Validations / Exceptions
returnValue.status		string		
returnValue.progressSummary		string		
returnValue.batchId		string		
returnValue.totalRecords		number		
returnValue.successCount		number		

returnValue.errorCount		number		
returnValue.errorDetails.headers				
returnValue.errorDetails.lines.1		Array		
returnValue.errorDetails.lines.1[0]		string		
returnValue.errorDetails.lines.1[1]		string		
returnValue.successDetails		Array		
returnValue.docStatus		string		
returnValue.docNumber		string		
returnValue.sourceSystemValue				
returnValue.documentId		string		
returnValue.documentUrl		string		
returnValue.poDetails		Array		
isSuccess		boolean		
errors		object		
exception		object		
errorMessage				
errorCode		object		
correlationId		string
